

CarePICS Software Development Center Locates in Denver

Source: CarePICS, LLC

Dated: Feb. 12, 2015

DENVER -- CarePICS, LLC has opened its new software development center in Denver's historic LoDo (Lower Downtown) neighborhood. Located adjacent to the newly completed Union Station transit facility, Coors Field, as well as numerous shops and restaurants. The CarePICS Software Development Center plants a strong foothold in the Denver tech scene, an industry which continues to experience tremendous growth in the area.

Project lead, John Williams commented, "We consider ourselves fortunate in attracting a core echelon of talented developers to our remote clinical imagery system development team. We plan to increase this head count throughout 2015 as growth continues to drive the need for new positions within our telehealth sector."

The Denver Development Center is the second facility for the Raleigh, NC-based company, which also operates a sales and service center near Research Triangle Park.

About:

CarePICS, LLC is a clinical imagery software company dedicated to bringing the next generation of patient encounter tools to the medical setting.
